5. scaffolding.

Question 4:

what is the name of Cake's database configuration file?

[ANSWER] Answer & Explanation:

By default it is database.php.default, you can find it in /app/config/database.php.default for connecting to database, it should be renamed to database.php .

Question 5:

Why we use cakephp?

[ANSWER] Answer & Explanation:

We have a more structural way of developing the project with an already installed development environment and we just have to start our rapid application straight a way with the business logic. Some of the key features the framework provides are,- MVC structure- Code generation- CRUD for database interaction- Application scaffolding- Code generation- Built-in validation- Data sanitation- Flexible casching- Localization Our primary goal is to enable you to work in a structured and rapid manner–without loss of flexibility.
