Backend Development

[NOTE] Important Note: This PDF contains sample questions with complete answers and explanations. Visit SolveMyQues.com for our complete question bank, interactive tests, and detailed performance tracking!

Question 1:

What is the view layer?

- A) It renders a presentation of modeled data
- B) It represents the part of your application that implements the business logic
- C) It handles requests from users
- D) Either b or c

[ANSWER] Answer & Explanation:

The View renders a presentation of modeled data. It is responsible for using the information it has available to produce any presentational interface your application might need.

Question 2:

What is the controller layer?

- A) It renders a presentation of modeled data
- B) It is responsible for rendering back a response with the aid of both the Model and the View Layer
- C) It handles requests from users
- D) Both b and c

[ANSWER] Answer & Explanation:

The Controller layer handles requests from users. It's responsible for rendering back a response with the aid of both the Model and the View Layer.

Question 3:

What is Laravel?

- A) A PHP framework
- B) A JavaScript library
- C) A database
- D) A web server

Question 4:

Which command creates a new Laravel project?

- A) composer create-project laravel/laravel
- B) laravel new project
- C) php artisan new
- D) Both A and B

Question 5:

What is Artisan in Laravel?

- A) A command-line interface
- B) A database tool
- C) A web server
- D) A template engine
